

# Our Botanical Peeling Collection

High-quality peelings and mineral treatments, enriched with pure plant extracts.

## About this Cooperation

**Prof. Dr. Biener GmbH** and **Aromen Natural Wellness** combine their expertise to create exceptional natural wellness experiences.

**Prof. Dr. Biener GmbH** recreates natural mineral springs, healing waters and healing baths to revitalize body and soul in a nature-identical way and creates unique salt concentrates using gentle mixing techniques.

**Aromen Natural Wellness** develops unique wellness experiences and ceremonies inspired by nature. Nature is the key to a healthy mind, body and soul. Only natural essential oils, carrier oils, hydrosols, clays and herbs are used. Ancient rituals are revived in combination with modern knowledge for the perceptive wellness customer.

The jointly developed Botanical Peeling collection with exquisite minerals and sugar, as a peeling or body wrap, in combination with natural essential oils and extracts, offers an incomparable sensory experience.

Wellness rituals at the highest level - inspired by nature.

# Our Philosophy

Prof. Dr. Biener GmbH and Aromen Natural Wellness share a common philosophy.

Our Botanical Peeling collection seamlessly blends science and nature, tradition and innovation to create a product line that nurtures and stimulates both body and mind.

We focus on sustainability and ethical practices when developing new products.

Learning from nature - Protecting and caring for our environment - State-of-the-art wellness treatments

# Botanical Peelings

High-quality scrubs, enriched with plant extracts

# Salt Peelings

A salt scrub is a beauty and skincare treatment that removes dead skin cells to reveal smoother, healthier-looking skin. A mixture of mineral crystals and oils is applied to wet or damp skin and then massaged in circular motions using gentle pressure. The gentle rubbing stimulates blood circulation, promotes cell renewal and leaves the skin looking refreshed and rejuvenated. Such peeling rituals have been known for centuries. They restore lost minerals to the skin and stabilize the natural skin barrier.

Natural oils such as apricot, argan or sunflower seed oil complement the exfoliating treatment and nourish the skin, removing dead cells. The skin's elasticity is supported and feels supple. Natural essential oils stimulate the sense of smell and enrich this treatment with a unique aromatherapeutic quality.

Natural oils make the skin soft and smooth

Natural plant extracts provide the products with harmonious colors

Homogeneous mineral crystals ensure maximum care

High-quality essential oils stimulate and nurture at the same time

## Botanical Salt Peeling

**Skin type:**

All skin types  
Blemished skin  
Dry & mature skin  
Combination skin

**Product features:**

- Regenerating**
- Balancing**
- Uplifting**

# Sugar Peelings

## Moisturizing wellness

The natural properties of sugar make it an excellent ingredient for gentle but effective exfoliation. The homogeneous sugar granules work wonders in removing impurities from the skin's surface. One of the biggest benefits of sugar scrub is its moisturizing effect. Unlike other exfoliants, sugar is a gentler form of skin care that draws moisture from the air, binds it and makes it available to the skin. A gentle peeling for demanding skin.

### Botanical Sugar Peeling

#### Packaging

-  80g
-  225g
-  10kg

## Lime

Immerse yourself in a world of tingling rejuvenation with our lime sugar scrub. Let yourself be carried away by the intense, fruity-fresh scent that will invigorate your senses. This revitalizing sugar scrub also helps to soothe acne, large pores and pigmentation spots. It contains antioxidants and vitamin C. It brightens and refreshes the skin, resulting in a radiant complexion.

#### Fragrance:

# The Mineral Booster Ritual for the steam bath

## Step 1: The right ambience

Accompany your guests into the steam room to gradually warm up their bodies. Put a few drops of the chosen oil on a towel and gently swirl it to spread a soothing scent in the steam room.

*Optional: While your guests are taking their seats in the steam bath, start the ultrasonic diffuser. This diffuses a mineral mixture of calcium, potassium and magnesium ions together with an essential oil of your choice. In this way, the beneficial minerals and essential oils can also be absorbed through breathing.*

## Step 2: Hot Mineral Peeling

Serve your guests the Hot Mineral Peeling with ginger and orange. Activate the calcium with water and allow your guests to apply it to damp skin. The application should focus on the shoulder and neck area, which is prone to tension. The warming sensation will spread throughout the body.

## Step 3: Shower or water ritual

Invite your guests to take a shower or perform a water ritual by rinsing them off with water.

## Step 4: Application of Magnesium Aqua Spray

Spray the Magnesium Aqua Spray onto your guest's body. The focus is again on the shoulder and neck area. The scent and the stimulating effect of this combination activate the benefits of the next step.

## Step 5: Cold Mineral Peeling

A cooling scrub that prepares the skin for everyday life while you relax in a hot steam bath. Guests will feel the potassium minerals on their skin, while the bergamot mint invigorates and relaxes, leaving them inspired. It is an incredible experience to feel the cold potassium in a warm environment.

## Step 6: Cool down, shower and relax

Thank your guests and recommend a gentle shower without rubbing the skin too hard afterwards. You can't do more good for the skin with natural minerals and oils. Your skin will feel like new!

In this mineral ritual, we provide important minerals such as calcium, magnesium and potassium.

## Calcium:

- \* *Component of the epidermal skin barrier:*  
Calcium is a component of the natural skin barrier function, which helps to protect against moisture loss and external irritants.
- \* *Skin care:*  
The exfoliating properties support the removal of dead skin cells and thus contribute to a smooth and healthy complexion.

## Magnesium:

- \* *Anti-inflammatory properties:*  
Magnesium minerals can be used to support the treatment of inflammatory skin conditions. It soothes and calms inflammatory skin conditions.
- \* *Skin hydration:*  
It helps to maintain adequate skin hydration and supports a smoother and more radiant complexion.

## Potassium:

- \* *Hydration and pH balance:*  
Potassium plays a role in regulating the skin's moisture content and pH balance, contributing to overall hydration and skin health.
- \* *Cellular function:*  
Potassium is involved in various cellular functions and contributes to the vitality of skin cells. These minerals work synergistically to support the overall appearance, integrity and protective function of the skin, making them essential for maintaining a vibrant and resilient complexion.

# Minerals for pools

Create your own exclusive pool experience with our minerals.  
Also available in combination with aromatherapy.

## Minerals for pools

Our mineral compositions offer you an innovative way to transform your baths into an exclusive wellness oasis. Our knowledge makes it possible to recreate any healing water and bring it into your bathtub, whirlpool or swimming pool. Embedded in a mineral ceremony, your guests will feel, sense and smell the full power of our natural minerals and extracts. Enriched with essential oils, the mineral bath provides aromatherapeutic qualities. Customize your baths to your desired effect and let your guests experience all the benefits of traditional bathing rituals and herbal ingredients combined with the latest technology and research.

## The Mineral Ritual by the pool

1. Prepare the desired amount of minerals for the ritual in a bucket with a ladle (or similar).  
*Optional:* For an aromatherapeutic experience, divide the minerals into two portions. Add your chosen essential oil to one portion to enhance the effect of the ceremony. Be sure to stir for one minute to evenly distribute the essential oils.
2. Explain the Mineral Ritual (and the benefits of the oil) at the poolside to introduce your guests to the ceremony.
3. Give each guest a handful of your unscented mineral mixture.
4. Ask them to briefly moisten the minerals under water and then rub them in their hands over the surface of the water. The guest will now feel the minerals and their properties (e.g. warmth, cold etc.). After this “feeling”, the minerals should be added to the water. Exfoliation is not recommended at this point, as the minerals work much better when they are dissolved in water. Furthermore, a peeling without an oil component is more likely to damage the skin. The minerals should create a “therapeutic environment” for body and mind in the water.
5. Now add the rest of the mineral mixture and the scented mineral mixture to this “environment” in the pool.
6. The guests should remain in this mineral environment for 10-15 minutes to achieve the maximum effect.

# Lithium

## The good mood bath

According to current studies, lithium ions are mood enhancers when taken orally. Lithium-containing medicinal springs, such as those found in Carlsbad and Vichy are traditionally used as drinking and bathing cures to brighten the mood.

In addition to their skin-caring properties, these natural minerals may also provide a little happiness.

### Packaging

Exclusively tailored to our customers; available for sale and as a mineral ritual in the pool.

# Calcium

## The all-rounder

Calcium is a vital component of our skin's natural barrier function, which protects it from dryness and unfavorable environmental influences. In addition to skin care, calcium can have numerous other preventive and nourishing properties.

### Packaging

Exclusively tailored to our customers; available for sale and as a mineral ceremony in a basin.

### Essential oils to enhance the experience

### Essential oils to enhance the experience

# Potassium

## Relaxation

Heavy sweating during sport or in the sauna can flush potassium out of the body. To prevent this, remineralization with potassium is essential. Potassium is recommended as a means of physical fitness and relaxation. Add the right essential oils to enhance the effect on your overall health.

### Packaging

Exclusively tailored to our customers; available for sale and as a mineral ceremony in a basin.

### Essential oils to enhance the experience

Black spruce

Cypress

Bergamot-mint

### Essential oils to enhance the experience

Myrrh

Rose geranium

Cedar Atlas

# Dead Sea salt

## Cleopatra's beauty treatment

Dead Sea salt is one of the richest in minerals in the world and contains important elements such as magnesium, potassium, calcium, bromine and iodine. The mineral bath maintains the elasticity of the skin and supports the treatment of skin diseases and respiratory complaints.

During the bath, the body absorbs the nourishing minerals and the skin's natural protective function is strengthened. Dead Sea salt baths are a valuable addition to traditional forms of treatment.

### Packaging

Exclusively tailored to our customers; available for sale and as a mineral ceremony in a basin.

Please contact us for an individual offer tailored to your needs.
